

Research in Experimental Particle Physics in January

Monday, 6 January 2025 - Friday, 31 January 2025

MIT, Building 24

Scientific Programme

FCC Student Research in January

During January we give students (undergraduates and graduate students alike) the opportunity to learn about the FCC project and perform a small research project that can be adjusted to the skill level of the individual.

The four week project can occupy 40 hrs per week and will include ten lectures on the foundational experimental background at an appropriate level and five hands-on tutorials to learn the tools of the trade.
