

Distortions from SI-TPC-TPOT matched Tracks

Xudong Tu, 16.01.2025

Global cartesian coordinate

Polar coordinate

Z-R plane

$$\tan \alpha = - P_{\Phi} / P_R$$

$$\tan \beta = - P_Z / P_R$$

- Reconstruct tracks - Si – TPC – TPOT match
 - Exclude TPC and fit Si – TPOT part to define trajectory
 - Check residuals in TPC
 - Directly evaluate R dimension of (static) distortion from dependence of the residual on local incident angle
