# What is Snowmass?

---

- The Division of Particles and Fields (DBF) of the American Physical Society (APS) is conducting a community study on the future of particle physics: [homepage](#).
- Years ago, such studies lasted several weeks and were held in summer in Snowmass, CO. Hence, “Snowmass”.
- 2013: numerous satellite meetings, culminating in two weeks in Minneapolis (same time as Lattice 2013).
- This Snowmass was expected to take place in 2020–2021, but paused 9 months in 2021 because of covid. Hence, 2020–2022.
- Will culminate with a 10-day meeting in Seattle, [July 17–26](#).

# Contributed Papers (aka whitepapers)

---

- Due March 15, 2022.
- I am writing/coordinating a whitepaper on behalf of USQCD, organized by Frontier, based on the seven 2019 USQCD whitepapers + updates.
- Authors nominally EC + 2019 WP authors. However, you will all have a chance to opt in as an author.
- For reasons that I don't want to go into here, I am way behind, but am in contact with Aida (Theory Frontier) and Ethan, Taku, Zohreh (LGT Topical Group).
