

MOU etc

Kate Pachal

Memorandum of understanding

- Not receiving CFI funding means way fewer requirements on how we work together and share equipment.
 - We were worried about making sure all experiments components sent here could count as matching for the funding agency. Without the funding agency, it really doesn't matter.
- So at this point, what agreements we want is more up to you (collaborators contributing equipment) than to the lab, I think.
- Nonetheless we have a draft MOU drawn up by the lab that we could consider! See next slides.

Indico contribution ...

Import/export

- Getting the first pair of GEMs up to Canada worked great. Doug handled export on a temporary loan.
- For the PMQs we did pay customs fees, but not clear to me yet how much
- Should we follow temporary loan mechanism for everything else too?
